

A number of modifications have been made to the new IKB Kip participant agreement with your Certifying Authority (CA). We have listed a number of points below, to help make this clear for you.
 [We advise you to read the entire agreement before signing]

digital or manual signature

Are you the authorised signatory for your legal entity? If so, you can sign the agreement. The CA also checks the Chamber of Commerce registration to see the name or names of the authorised signatory or signatories.

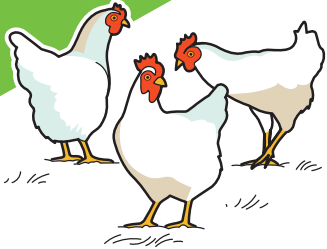

The new agreement facilitates better and faster sharing of important information between you and your CA. And it is possible to act faster in cases of incidents. New privacy and data protection legislation (General Data Protection Regulation (GDPR)) has also been included.

YOUR DATA

The new agreement contains a GDPR attachment. This new general data and privacy legislation ensures that protection of personal data is regulated in the same way throughout the EU. The important factor here is that it strengthens and extends your rights on privacy. Your data may only be used under strict conditions.

You give permission for the CA and scheme manager PLUIMNED foundation to use information about matters such as salmonella and antibiotics.

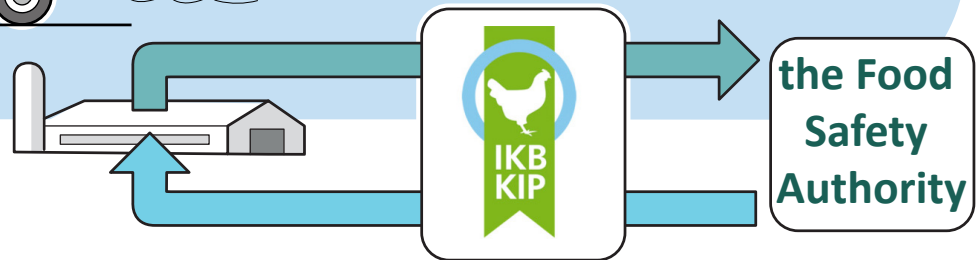

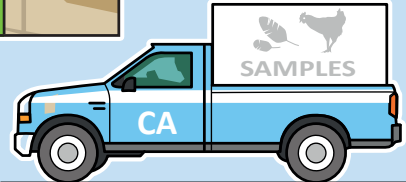

Inspections can occur without prior notice and the CA has permission to take samples.

Operational management

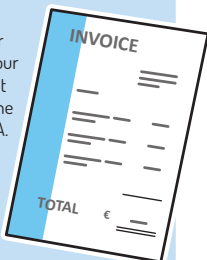

Harmful substances

Any changes that you submit to your CA are now described more clearly. You communicate changes to operational management and important matters such as the discovery of harmful substances at your farm as soon as possible to your CA.

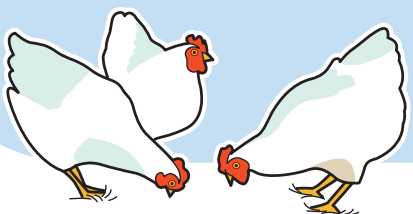

Information sharing between IKB Kip and the Food Safety Authority has greatly improved. So that there can be faster and better action in the event of incidents. This also means that you will be informed quicker.

The costs on your invoice comprise your IKB Kip participant contribution and the charges for the CA.

Once you meet all the scheme's conditions, you will receive an IKB Kip certificate.

Please note - In the event of non-compliance with agreements, a decision may be taken to terminate the agreement immediately.
